## Course Overview

This 1 day course will deliver a mix of top-tips and techniques for using 2 different laser modalities, a discussion on pros and cons of each modality, pitfalls on setting up a laser service as well as edited video techniques for each modality. Invited experts will give their views on their modality. Each participant will have the opportunity over 3 sessions to have hands on experience and training in HOLEP and Greenlight XPS guided by experts in these fields on fresh cadaveric prostates. Simulators and morcellation will also be available.

### OBJECTIVES

- Understand the advantages and disadvantages of HOLEP and Greenlight XPS.
- Experience the difference in techniques and laser energy delivery between each modality.
- Have practical hands on training in each modality on cadaveric prostates.
- Train in safe morcellation after HOLEP

### COURSE INCLUDES

- High power KTP laser vapourisation (Greenlight XPS) using MoXy saline cooled fibres
- Holmium laser Enucleation of the Prostate (HOLEP)
- Morcellation of prostate tissue

### TARGET AUDIENCE

This course is aimed at consultants and senior trainees who are interested in Prostate Laser Surgery, Holmium and high power KTP techniques
